(2) Summary of Significant Accounting Policies

Basis of Presentation

The accompanying financial statements of the Liberty Plan have been prepared on the accrual basis and present the net assets available for benefits and the changes in those net assets.

Investments

Investments are reflected in the accompanying financial statements at fair value. Fair value represents the closing prices at December 31, 2019 and 2018 for those securities having readily available market quotations.

The following closing market prices have been used to value the Liberty Plan's investment in common stocks:

|   | December 31, |          |

(a) See Reorganization Transaction Impacting Stock Funds note 4.

Securities and investment transactions are accounted for on the trade date. The cost basis of such shares distributed is determined using the average cost method. Dividend income is recorded on the ex-dividend date. Income from other investments is recorded as earned on an accrual basis. The net appreciation or depreciation in fair value of investments (net realized and unrealized gains or losses) is reflected in the accompanying statements of changes in net assets available for benefits and is determined as the difference between the market value at the beginning of the year (or date purchased during the year) and selling price or year-end market value.

See notes 3, 4 and 5 for additional information regarding the Liberty Plan investments.

Notes Receivable from Participants

Notes receivable from participants are measured at their unpaid principal balance plus accrued but unpaid interest. Defaulted participant loans are reclassified as a distribution based upon the terms of the Liberty Plan document.

Fair Value Measurements

GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

⌚ Level 1

Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Liberty Plan has the ability to access.

⌚ Level 2

Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

⌚ Level 3

Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

Certain investments are reported at fair value on a recurring basis in the statements of net assets available for benefits. The following methods and assumptions were used to estimate the fair values:
